Overview: Lab tasks for eFolio

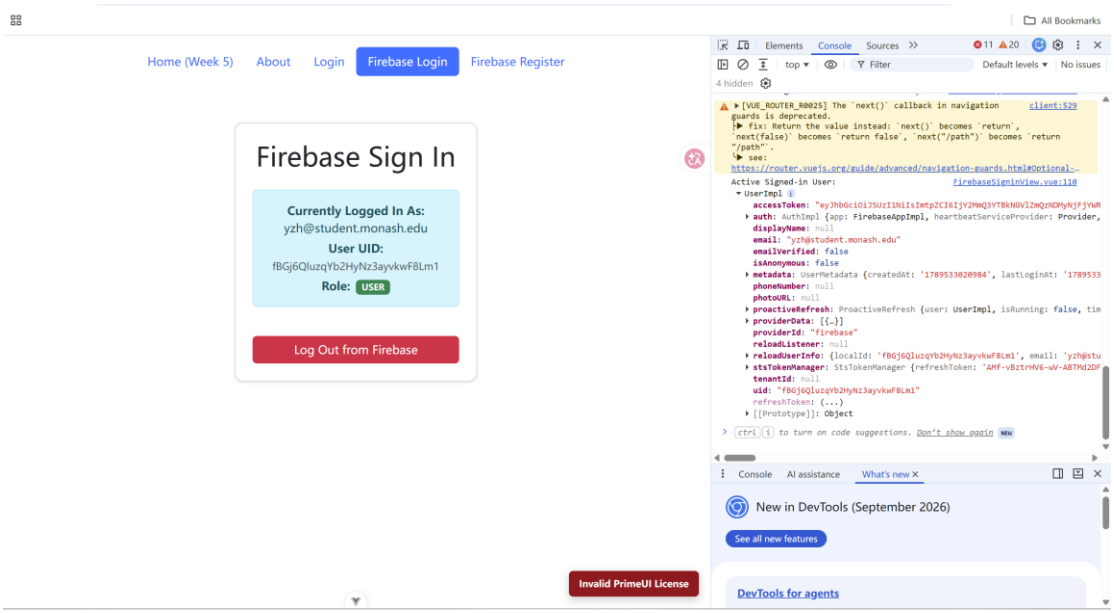

EFOLIO TASK 7.1 (PASS AND CREDIT LEVEL)

Screenshot set 1: Screenshot of the registration page on the browser and Visual Studio code

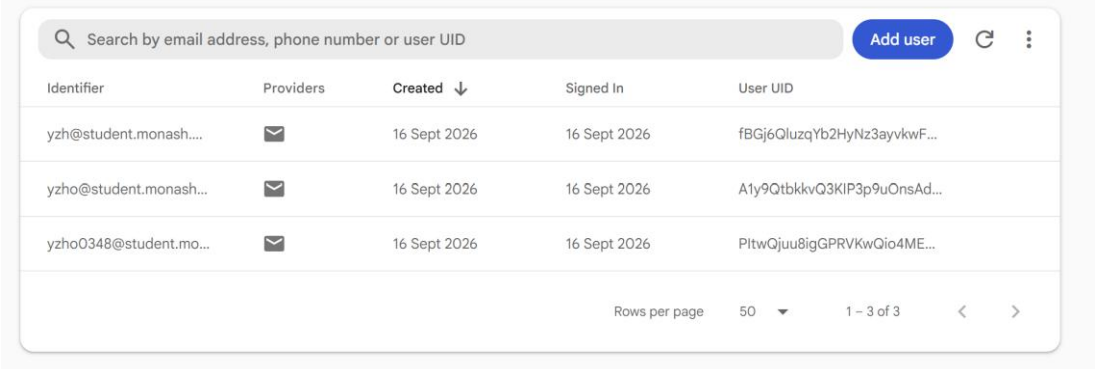

```
74  const register = () => {
75    errorMessage.value = ''
76    successMessage.value = ''
77
78    if (!email.value || !password.value) {
79      errorMessage.value = 'Please enter both email and password.'
80      return
81    }
82
83    createUserWithEmailAndPassword(auth, email.value, password.value)
84      .then((userCredential) => {
85        console.log('Firebase Register Successful!', userCredential.user)
86        // Store user role for Role-based Access Control (eFolio 7.2)
87        localStorage.setItem('userRole', role.value)
88        localStorage.setItem('userEmail', userCredential.user.email || '')
89
90        successMessage.value = `Account created successfully as [${role.value.toUpperCase()}]
91        setTimeout(() => {
92          router.push('/FireLogin')
93        }, 1500)
94      })
95      .catch((error) => {
96        console.log('Register Error Code:', error.code)
97        errorMessage.value = error.message
98      })
99  }
```

Screenshot set 2: Screenshot of the login page on the browser and Visual Studio code with console panel to show current user

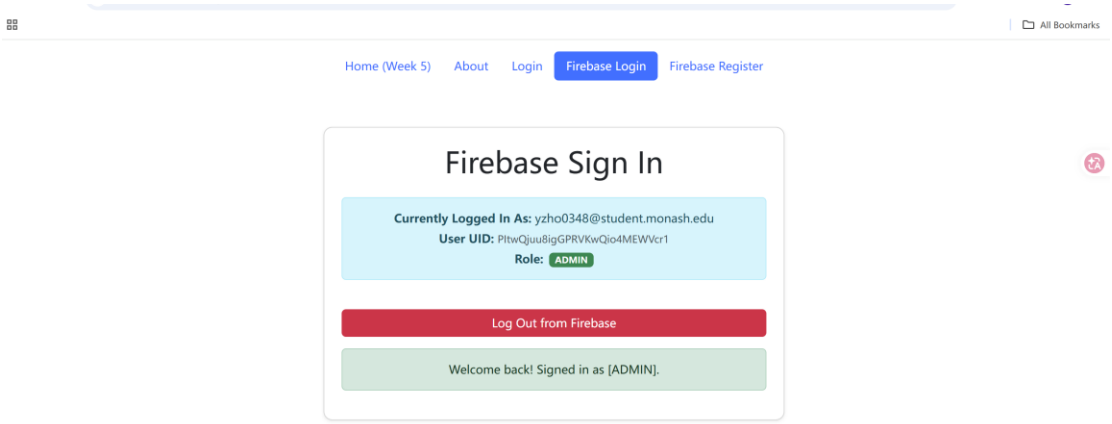

```
118  const signin = () => {
119    errorMessage.value = ''
120    successMessage.value = ''
121
122    if (!email.value || !password.value) {
123      errorMessage.value = 'Please enter both email and password.'
124      return
125    }
126
127    signInWithEmailAndPassword(auth, email.value, password.value)
128      .then((userCredential) => {
129        console.log('Firebase Sign in Successful!')
130        // Task 7.1 Requirement: Show current user in console panel
131        console.log('Current User (auth.currentUser):', auth.currentUser)
132
133        // Task 7.2 Requirement: Multiple Roles in the system
134        localStorage.setItem('userRole', selectedRole.value)
135        localStorage.setItem('userEmail', userCredential.user.email || '')
136        currentRole.value = selectedRole.value
137        currentUser.value = auth.currentUser
138
139        successMessage.value = `Welcome back! Signed in as [${selectedRole.value.toUpperCase()
140      })
141      .catch((error) => {
142        console.log('Login Error Code:', error.code)
143        errorMessage.value = error.message
144      })
145  }
```

Screenshot 3: Registered user on Firebase

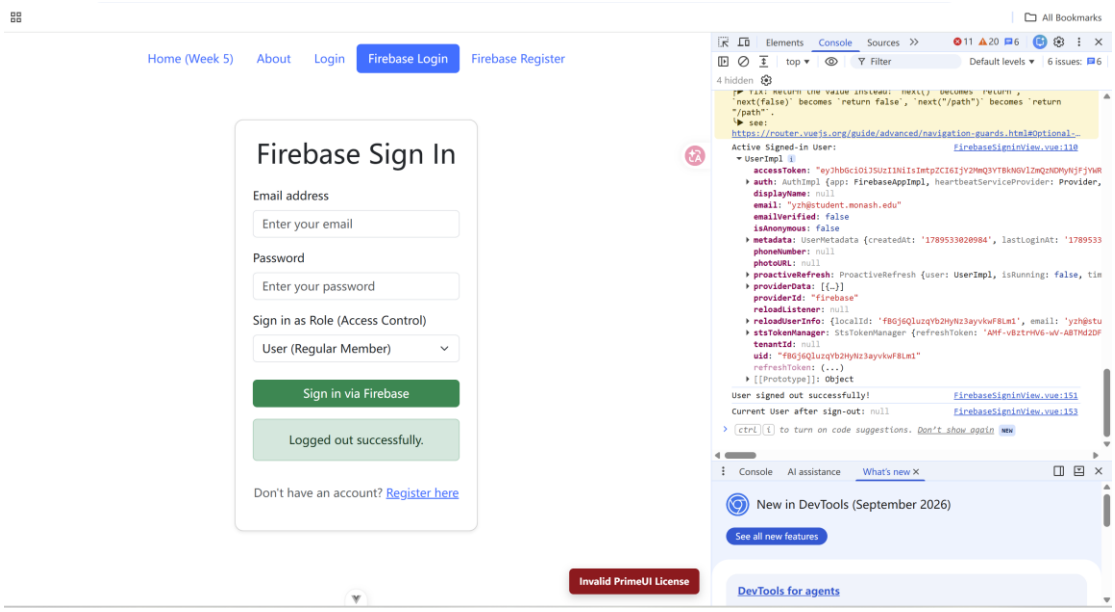

EFOLIO TASK 7.2 (DISTINCTION AND HIGH DISTINCTION LEVEL)

Screenshot set 1: Screenshot of browser and visual studio code that indicate you can sign in by multiple roles in the system

Screenshot set 2: Screenshot of Log out page with developer console to show current user
